## New to Bee Brazilian

### XTREME LASHES

Single lash extensions glued to one eyelash at a time. The process of a full set takes 2 hours. Xtreme Lashes come from America; the glue that is used in the process is FDA approved with no toxic fumes and is completely safe. The extensions last up to 2 months, so are perfect for Brides and will last through the honeymoon. Your lashes can be tinted first so wearing mascara can be limited. Beware there are inferior products hitting the Australian market like everything else we only stock the very best available.

### MANCINE TANNING LOTION

We are now doing trial sessions of the Mancine Tanning Lotion on everybody's legs for \$7.00. We love this self tanning lotion, others pale in comparison and we know you will love it too! It is priced at \$25.00 a bottle and will last up to 6 Full Body applications. It works well when used in conjunction with your spray tan as an extender.

## Price Increases

Unfortunately due to increases from our suppliers we have had to slightly increase some of our service prices.

We have tried to minimise the impact please find the new pricelist enclosed.

The increases will become effective as at 1st July.
